

How refuse collection works:

- In Sicily, rubbish is not collected from outside each house. You must place your bags of rubbish in a public dumpster. There is one at the end of most streets.
- The law says rubbish should be left in these bins after 6pm and before 7am.
- The standards of refuse collection differ considerably from city to city. A few cities have successfully implemented recycling programmes.

What you can do:

- If there are bins for recyclable material, check the symbols on them and separate your refuse accordingly.
- Please dispose of your rubbish every day.
