

Awnings and Sun blinds

- There are three fixtures to provide you with shade:
 - + sun blind outside the bedroom (adjusted manually),
 - + sun blind outside the kitchen (small window, remote control),
 - + large awning (over the terrace, adjusted manually).
- Please close the bedroom and kitchen blinds when it rains. They are not made to withstand rainfall.
- The large awning over the terrace can be used to protect you from light rain as well as providing shade. This means you can still leave the patio door in the kitchen open if it is drizzling.
Important: Please fully retract this awning in thunderstorms and/or strong winds and close all windows.
